

PANDUAN PENGGUNAAN REPO STIKES (ADMIN)

Kebanyakan proses dalam pengelolaan Repo Stikes Borneo Lestari dilakukan oleh User dan Editor. Jadi Admin disini hanya mengontrol proses tersebut. Hak Akses Admin bisa digunakan untuk mengubah tampilan serta melakukan perubahan data server. Untuk perubahan kode atau halaman tidak dijelaskan disini, namun akan dijelaskan pengelolaanya sebagai admin.

Halaman Repositori ini tidak statis jadi setiap data yang masuk tidak langsung terdeteksi, jadi harus reindex data manual. Sebagai contoh jika kita mengupload file misal Skripsi, jika dipencarian data tidak muncul data yang baru saja diupload maka kita harus melakukan pengindexan kembali. Caranya seperti berikut :

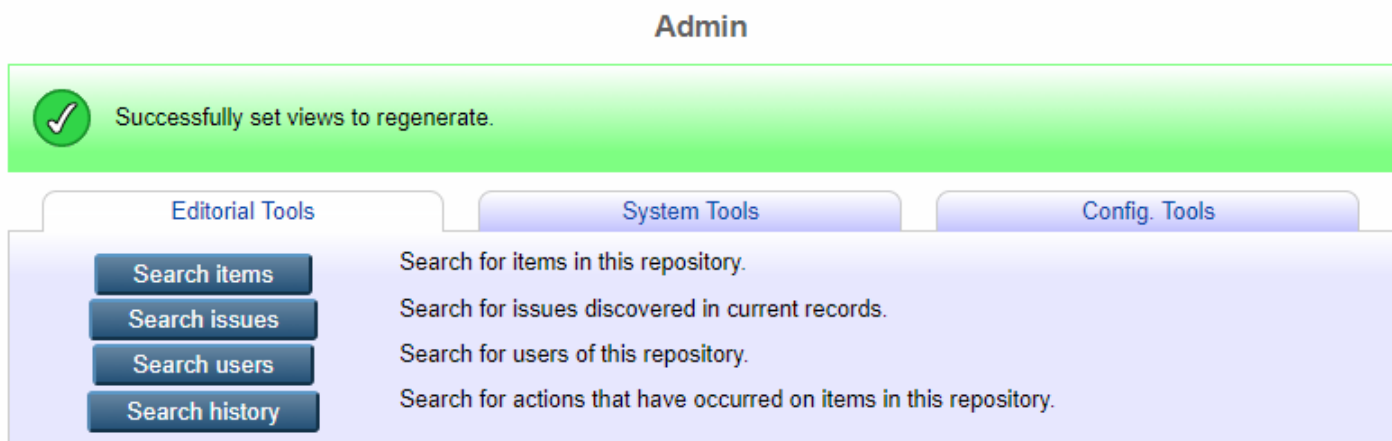

1. Login seperti biasa menggunakan akun Admin
2. Pilih menu Admin > System Tools

The screenshot shows the 'Admin' interface with three tabs: 'Editorial Tools', 'System Tools', and 'Config. Tools'. The 'System Tools' tab is active, displaying a list of tools and their descriptions:

Tool	Description
Status	Status information for this server.
Create user	Create a new user account
Force Start Indexer	Forcefully stops and cleans up the indexer, then restarts it.
Stop Indexer	Stops the full-text indexer.
Regenerate Abstracts	Cause abstract pages to be regenerated when they are next requested.
Regenerate Views	Cause views pages to be regenerated when they are next requested.
EPrints Bazaar	Manage, Update and Install add-ons from the EPrints Bazaar.
Send Test Email	Test your email configuration by sending a test email.
Database Schema	Show the database schema.

3. Klik Regenerate Views. Maka akan tampil seperti ini

The screenshot shows the 'Admin' interface with a green success message at the top: 'Successfully set views to regenerate.' Below the message, the 'System Tools' tab is active, displaying a list of tools and their descriptions:

Tool	Description
Search items	Search for items in this repository.
Search issues	Search for issues discovered in current records.
Search users	Search for users of this repository.
Search history	Search for actions that have occurred on items in this repository.

4. Kemudian kembali System Tools > Config. Tools. Untuk mereload konfigurasi file.
